**EVALUATION ON THE ONLINE
PLATFORM:
ASSIGNMENTS**

Design and Qualification of Assignments

POSSIBLE APPLICATIONS:

- Submission of assignments or practical work
- Self-assessment (if designed for this purpose)
- Peer review

-
- Grading options
 - Automatic activation/deactivation
 - Student feedback
 - Individualized management
 - Group publishing option
 - Group submissions
 - Option to allow resubmissions
 - Data export/import: grades and assignments
 - Rubric-based grading

Design and Qualification of Assignments

Recommendations for **active learning**

- ✓ Organize activities that develop creative thinking.
- ✓ Create questions that induce cognitive conflict to foster an active approach to learning.
- ✓ Present incomplete information to generate interest in searching for and consulting documents.
- ✓ Provide materials that facilitate the connection of learning content.

Design and Qualification Assignments

Turnitin

Is a **web-based text-matching software used** primarily by educational institutions **to check student writing for plagiarism** by comparing submitted work against a vast database of internet content, publications, and other student papers, generating an "Originality Report" to highlight potential similarities.

It also offers tools for **digital grading** (Feedback Studio), **AI writing detection**, and **citation analysis**, serving as both a deterrent and an educational tool to help students improve academic integrity and proper referencing.

**EVALUATION ON THE ONLINE
PLATFORM:
TEST & QUIZZES**

Design and Qualification Test&Quizzes

POSSIBLE APPLICATIONS:

- Periodic assessments (Monitoring student work)
 - Learning practices
 - Surveys (Exams vs. Polls)
-
- Self-assessment option
 - Self-correction in multiple format (test, fill in the blanks, calculated question, matrix of options...)
 - Automatic activation/deactivation
 - Student feedback (immediate, on a later date, etc.)
 - Individualized management
 - Security features available (Ips access, Safe Exam Broser, second key...)
 - Option to allow resubmissions
 - Data export/import: grades and assignments
 - Rubric-based grading
 - Statistical and analytical reports

Design and Qualification Test&Quizzes

Recommendations for creating multiple-choice exams

- ✓ Determine what you want to ask and how: balance levels, themes, etc.
- ✓ Ask about what's important (number of questions).
- ✓ Sequence: write the question, write the answer, write alternatives, reorder.
- ✓ Question: Clear, not identical to the text, doesn't give away clues (encourages higher-order cognitive processes).
- ✓ Answer: Similar length, same scope, connected to the question, clearly correct, not synonymous, not "ridiculous."

Design and Qualification Test&Quizzes

Safe Exam Browser

Safe Exam Browser (SEB) is **a program designed to be used for digital exams where students don't have access to other programs on the computer during the exam.** SEB is quick to install and is available for Windows, macOS, and iOS.
